PROVIDENCE ALASKA MEDICAL CENTER  
RADIOLOGY CONSULTATION

Patient: ALLEN, TODD A  
BOX 3501  
VALDEZ, AK 99686  
(907) 223-8728

Med. Rec. No: 618279  
DOB: Mar 30 1967 - 36Y  
Order No: 90002  
Clinician: SUSAN DIETZ  
Att Clinician: SUSAN DIETZ  
Att Clinician: SUSAN DIETZ

Exam Date: Apr 19 2003 6:47  
Sex: Male  
SS#: 574-48-4274  
Admission #: 010310900209

Room & Bed: IMC-202101  
Pl Class: ER

Reason: code 99  
Comment: er 2  
Clinical Data: CODE 99

Accession No. 2113616

CAX 4105 - HEAD OR BRAIN NO CONTRAST CT - CPT's: 70450- ---:

RESULT: CT BRAIN - The findings were discussed with Dr. Dietz in the Emergency Department.

Bone images demonstrate no acute calvarial changes, but there is a metallic density seen along the posterior aspect of the right zygomatic arch which is reportedly a plate for repairing bony injury. A few scattered air-fluid levels are seen in the sinuses, in particular the sphenoid sinus, which could represent either sinusitis or blood.

The brain demonstrates diffuse decreased attenuation with loss of the differentiation between the white and the gray matter in the cerebellar hemispheres and in the cerebrum. There is diffuse high-density material in the subarachnoid spaces consistent with a subarachnoid hemorrhage. The ventricles are slightly compressed, but no shift of the midline structures is noted. No abnormal extraaxial fluid collection is seen. The fourth ventricle cannot be visualized, and the third ventricle appears slightly compressed also.

IMPRESSION: 1/ SUBARACHNOID HEMORRHAGE. 2/ FRAGMENTS CONSISTENT WITH DEVELOPING DIFFUSE CEREBRAL EDEMA.

Report called to Dr. Dietz in ER.

Reading Doctor: DAVID A MOELLER M.D.
